# ELA Institute for Facility Management Education

## The ELA Institute

**The Institute** - The ELA Institute for Facility Management Education offers educational programs to meet the unique continuing educational and training needs of facility managers and their personnel. The ELA Institute is operated by the Educational Departments of the Electric League of Arizona and the Arizona Heat Pump Council. The curricula for the Institute's educational programs were developed by industry practitioners and educators, associated with the ELA and the AHPC, the lead instructors for both organizations, and the Energy Efficiency Department at APS. These programs are designed for a wide range of facility management personnel, including maintenance technicians, and managers of large, complex, multi-facility organizations.

**The Electric League of Arizona** - The Electric League of Arizona founded in 1960 is a statewide, multi-industry trade association supporting the electrical, HVACR and energy management industries through education; publications, including trade and consumer newspapers and Buyers' Guide; consumer referral services and other utility trade ally programs. The Electric League of Arizona also provides the HVACR Continuing Education Program offered by the Arizona Heat Pump Council and the Electrical Continuing Education Program offered in conjunction with GateWay Community College.

## Building Operators' Certificate Program

The ELA Institute for Facility Management Education presents an educational program leading to a certificate in Building Operations. The certificate will be of most benefit to managers with total responsibility for multi-facilities, as well as those with single facility responsibility.

The Faculty is composed of the lead instructors for the Education Departments of the Electric League of Arizona and the Arizona Heat Pump Council; APS energy personnel; SRP energy personnel; and guest instructors, as appropriate. The program is offered eight hours a day, one-day a week for 8 weeks at the ELA Institute located in the Electric League of Arizona Education Center.

## Course Coverage

### FME 101

#### HVAC FUNDAMENTALS IN A COMMERCIAL/INDUSTRIAL FACILITY

**Course Description:** A discussion of commercial systems, chiller systems, and A/C control systems in a modern industrial setting.

**Course Content:** A discussion of types of systems and controls working with application sequences, energy efficiency, diagrams and specific HVAC Controls.

- Reviews heating, cooling, and ventilation
- Commercial systems and their applications
- Commercial condensers, evaporators and compressors
- Centrifugal, screw, scroll and reciprocating applications
- Types of chillers and their applications
- A/C Control Systems
- Work with specific systems diagrams
- Chiller Systems
- Specific HVAC Controls
- KW per ton and energy usage

### FME 102

#### AIRFLOW DYNAMICS FOR THE COMMERCIAL/INDUSTRIAL FACILITY

**Course Description:** A thorough understanding of airflow dynamics can enable you to uncover and resolve system problems.

**Course Content:** An overview of what causes most airflow related problems and how they can be prevented.

- Airflow dynamics
- Central air systems
- Airflow systems and components
- Variable speed fans and pumps
- Ventilation requirements for HVAC
- Types of fans
- Airflow testing and instruments

### FME 103

#### HVAC CODES AND SAFETY FOR THE COMMERCIAL/INDUSTRIAL FACILITY

**Course Description:** A discussion of local and national health, safety, energy and environmental codes as they relate to the HVAC system in a Commercial/Industrial Facility.

**Course Content:** An overview of codes, standards and specifications and how they apply in a Commercial/Industrial Facility.

- EPA Codes
- Mechanical Codes

### FME 104

#### ELECTRICAL CODES AND STANDARDS FOR THE COMMERCIAL/INDUSTRIAL FACILITY

**Course Description:** Electrical, energy management and related codes that facility managers must know.

**Course Content:** Compliance with the most important maintenance related codes and their application to an energy efficient building.

- 2017 National Electrical Codes

### FME 106

#### ELECTRICAL SAFETY FOR THE COMMERCIAL/INDUSTRIAL FACILITY

**Course Description:** A discussion of commercial facility safety practices as it relates to electrical systems.

**Course Content:** An overview of safety practices related to electricity and how it relates to the Commercial/Industrial Facility.

- Recommended safety practices
- OSHA Codes

### FME 107

#### LIGHTING FUNDAMENTALS AND EFFICIENCY FOR THE COMMERCIAL/INDUSTRIAL FACILITY

**Course Description:** A broad-based discussion of lighting fundamentals and efficiency and how they're applied to a Commercial/Industrial Facility.

**Course Content:** An overview of the Lighting Industry.

- Lighting fixture technology and efficiency
- Applications and Strategies
- Light Source/Efficiency/Common Retrofits
- Lighting maintenance

# Course Coverage continued

## FME 108

### POWER QUALITY FOR THE COMMERCIAL/INDUSTRIAL FACILITY

**Course Description:** The basics of important, "Need to know" power quality issues in your facility. Learn as the instructor performs a real, hands-on analysis of a large facility.

**Course Content:** An overview of what causes most Power Quality related problems and how they can be prevented.

- Techniques for identifying PQ symptoms
- Trouble-shooting common problems

## FME 109

### INDOOR AIR QUALITY FOR THE COMMERCIAL/INDUSTRIAL FACILITY

**Course Description:** The purpose of this course is to familiarize the attendees with Indoor Air Quality.

**Course Content:** This course will cover how to identify and understand air quality issues, and how this impacts the facility.

- Identify common conditions conducive to mold growth
- Understand the possible health effects of mold
- Be familiar with the visual characteristics
- Understand how to prevent mold
- Understand the dramatic effect of mold in the facility

## FME 110

### ENERGY CONSERVATION TECHNIQUES

**Course Description:** The use of energy in commercial buildings and how to identify and prioritize conservation opportunities.

**Course Content:** An overview of the basics of energy accounting, evaluation of fuel options, operation and maintenance strategies to improve efficiency, and energy management planning techniques.

- Implementing an effective energy management program
- Use of infrared technology to measure thermal losses

- Developing an energy efficiency "checklist" for a facility
- Utility fact sheets that are customized for different facilities and energy end uses
- Sensible retrofits
- Case studies of local facilities
- Building controls
- HVAC maintenance
- Efficient lighting
- New technologies

## FME 111

### ENERGY AUDIT

**Course Description:** The essentials that a building operator should know about how to measure the energy performance of their facilities.

**Course Content:** An overview of where your facility uses energy and how your facilities' energy use compares to your competition.

- Find out where you spend the most and where the most opportunities for savings exist
- Techniques for studying your energy usage history and downloading your account data into spreadsheets to analyze usage and quickly highlight important trends
- Energy end-use data that shows typical energy breakdowns for different types of facilities
- Essential for operators who manage multiple facilities

## FME 112

### DIRECT DIGITAL CONTROLS

**Course Description:** An introduction to the application of Direct Digital Controls (DDC) to operating a building's temperature control system.

**Course Content:** Topics will include:

- The ability of the system to process data
- Input & output types, transducers, variable frequency drive (VFD) theory, communication protocols (LON & BACnet), programming vs. configuring controllers
- Workstation basics
- How to make the controls act like an Energy Management System (EMS).
- Specific manufactures will not be covered, only the overall theory of how these systems operate.

## FME 115

### DESIGN & OPERATION OF COMMERCIAL CHILLED WATER SYSTEMS

**What You Can Expect:** This class provides an overview of the design and operation of Building Chilled Water Systems including piping system design and unit components.

### Piping System Design

- A. Direct & Reverse Return Piping Systems
- B. Pipe Sizing
- C. Piping Specialties
- D. Flow Control

### Equipment

- A. Pumps
- B. Chillers
- C. Terminal Units (Air Handliners, Fan Coil Units, Coils)
- D. Cooling Towers
- E. Compression-Expansion Tanks

The ELA Institute for Facility Management Education opened its doors in the fall of 2002 with the first Facility Maintenance Technician Program. To date, The Institute has graduated over 650 students in this program. These students represent about 300 companies through out the state of Arizona.

The Building Operators' Certificate Program was added to the Institute in the fall of 2003. The Institute has graduated over 200 students in this program, representing about 150 companies state wide.

The Institute's instructors are expert practitioners in their specific field and bring a wealth of up to date knowledge to each class.

# ELA Institute for Facility Management Education

## Facility Maintenance Technician Program

**About the Program:** Sponsored by 

Operated by  

This program has been designed and taught by industry educators and practitioners, associated with the Electric League of Arizona's education department and the Arizona Heat Pump Council. Upon completion of this 16 week, 2 nights a week program, successful students will receive a Certificate of Completion and Facility Maintenance Master Technician Patches. (A "C" average or better is required for successful completion.)

### Course Coverage

(Order and content is subject to change)

#### HVAC Curriculum:

The HVAC training will include a comprehensive review of Refrigeration System fundamentals, refrigerants, HVAC Equipment, air movement and measurement, air quality, residential and commercial systems, air & water source heat pumps.

- Refrigeration Theory I
- Refrigeration Theory II
- Refrigeration Components
- Introduction to Refrigerants
- Charging & Piping
- A/C Control Systems I
- A/C Control Systems II
- Review & Quiz
- Refrigerators & Freezers
- Residential Systems - Air Conditioning
- Residential Systems - Heat Pumps
- Commercial Systems
- Air Quality & Distribution (Air Flow)
- HVAC Systems Troubleshooting
- Servicing Commercial Systems
- Review & Final Exam

#### Electrical Curriculum:

The electrical training will include a comprehensive review of basic electrical fundamentals; practical installation, operation, maintenance, and troubleshooting techniques, with an emphasis on electrical safety procedures.

- Concepts of Electricity I
- Concepts of Electricity II
- Basic Circuitry I
- Basic Circuitry II
- Basic Circuitry III
- Commercial & Industrial Buildings Practical AC Circuits
- Commercial & Industrial Practical AC Power Delivery
- Building Systems Control Systems
- Electrical Codes & Standards
- Basic AC/DC Rotating Electrical Machinery
- Variable Frequency Drive Systems I
- Variable Frequency Drive Systems II
- Electrical Power Quality Commercial & Industrial
- Electrical Troubleshooting I
- Electrical Troubleshooting II
- The Importance of Electrical Safety

### Facility Maintenance Program Registration

**Tuition** (Space is limited register early) (Tuition includes all books and applicable fees)

**\$865 ELA Member/\$915 Non-Member • Contact the Institute for more information at 602-263-0115**

**Dates: August 14 - December 6, 2018 • Tuesdays & Thursdays • Time: 6:00 p.m. - 8:50 p.m. No class week of Nov. 19.**

**Location: Electric League Training Center, 2702 N. 3rd Street Suite 2020, Phoenix, AZ 85004**

**HVAC Program: Tuesdays • Electrical Program: Thursdays**

# ELA Institute for Facility Management Education

## Facility Management General Studies

The ELA Institute for Facility Management Education presents its General Studies continuing education program. The General Studies Program was developed to meet the unique training needs of facility maintenance personnel who wish to participate in continuing education on an individual course basis to refresh existing job skills or learn new skills. Students interested in more structured curricula may wish to consider the Institute's Certificate programs.

### HVAC Courses

#### HPC 126

##### REFRIGERATION FUNDAMENTALS

Date: August 8, 2018  
Fees: \$114 Mbr/\$144 Non-Mbr  
Time: 6:00 p.m. - 9:30 p.m.  
Instructor: Robert MacPherson  
4 Continuing Education Credits

**What You Can Expect:** This class covers all the fundamentals of refrigeration and is highly recommended to take prior to the popular Refrigeration Theory & System Diagnosis.

#### HPC 101

##### REFRIGERATION THEORY & SYSTEMS DIAGNOSIS

Dates: August 13 & 15, 2018  
Fees: \$120 Mbr/\$150 Non-Mbr  
Time: 6:00 p.m. - 9:30 p.m.  
Instructor: Rich Porter  
4 Continuing Education Credits

**What You Can Expect:** This course will review mechanical refrigeration theory and system troubleshooting. The four basic components, reversing valves, superheat, sub-cooling, sensible heat, latent heat and BTU's are all reviewed. This course will focus on heat pump operation and diagnosis. If you do not have service experience and/or refrigeration training, Refrigeration Fundamentals is a recommended prerequisite.

#### HPC 102

##### CHARGING, PIPING, & DEHYDRATION

Dates: August 21, 23 & 28, 2018  
Fees: \$140 Mbr/\$170 Non-Mbr  
Time: 6:00 p.m. - 9:30 p.m.  
Instructor: Joel Harris  
4 Continuing Education Credits

**What You Can Expect:** Did you know factory studies of failed compressors show a large amount of compressor failures are caused by improper refrigerant levels? This is not a well-known fact in our industry. Refrigerant charge imbalances cause slow degradation of the compressor bearings, valves and motor windings. This results in compressor failures occurring some time after the charge becomes unbalanced, making the connection between refrigerant levels and malfunctions difficult. Improper piping and contaminants are also big offenders.

#### HPC 103

##### ELECTRICAL FUNDAMENTALS FOR HEAT PUMPS

Dates: September 4 & 6, 2018  
Fees: \$114 Mbr/\$144 Non-Mbr  
Time: 6:00 p.m. - 9:30 p.m.  
Instructor: Carl Bartoli  
4 Continuing Education Credits

**What You Can Expect:** This class will focus on basic electricity as it pertains to heat pump operations. Topics to be covered include basic electron theory, electromagnetism and PSC motor theory. You will understand how compressors run and start systems work. Having an understanding of capacitor and potential relay operation on an electron level can help the service technician diagnose and avoid malfunctions that are commonly overlooked.

#### HPC 104

##### CONTROL SYSTEMS FOR HEAT PUMPS

Dates: September 11 & 13, 2018  
Fees: \$114 Mbr/\$144 Non-Mbr  
Time: 6:00 p.m. - 9:30 p.m.  
Instructor: Carl Bartoli  
4 Continuing Education Credits

**What You Can Expect:** Participants will attain the knowledge to design an entire electrical system for a residential heat pump. You will also learn the theory of operations and diagnostics of heat pump control circuitry including calibration and testing of common brands of thermostats, cooling and heating anticipation circuits, and commonly used electromechanical and electronic defrost systems.

#### HPC 106

##### HVAC CODE & SAFETY

Dates: September 17 & 19, 2018  
Fees: \$174 Mbr/\$204 Non-Mbr  
Times: 6:00 p.m. - 9:30 p.m.  
Instructor: Travis Howard  
4 Continuing Education Credits

**What You Can Expect:** This class is designed to make you more comfortable with the International Mechanical Code. In this interactive class, popular code issues and interpretations will be discussed. Come prepared to discuss your personal experiences with the Code.

#### HPC 107

##### AIRFLOW DYNAMICS

Dates: September 24 & 26, 2018  
Fees: \$114 Mbr/\$144 Non-Mbr  
Time: 6:00 p.m. - 9:30 p.m.  
Instructor: Rich Porter  
4 Continuing Education Credits

**What You Can Expect:** Airflow is one of the most critical issues for customer comfort. Many comfort complaints and improper system operation problems are a result of poor air distribution. A thorough understanding of airflow dynamics can enable you to uncover and resolve system problems. This course will help you identify inadequate or excessive airflow issues. It will help you solve complaints of hot spots, drafts, noises and stale air. Frequently airflow problems can be easily solved by a minor adjustment or changing to a better register.

#### HPC 165

##### DESIGN & OPERATION OF COMMERCIAL CHILLED WATER SYSTEMS

Dates: December 11 & 13, 2018  
Fees: \$114 Mbr/\$144 Non-Mbr  
Times: 6:00 p.m. - 9:00 p.m.  
Instructor: Vic Pietkiewicz  
4 Continuing Education Credits

Location: Electric League of Arizona Training Center • 2702 N. 3rd Street, Ste. 2020, Phoenix, AZ 85004

**Note:** Students who have completed the Facility Maintenance Technician Program can complete the FME 115 version of this course for an Advanced Course Certificate of Completion in Facility Management Studies.

**What You Can Expect:** This two-session class provides an overview of the design and operation of Building Chilled Water Systems.

**Course Content:** Class 1: Piping System Design

- A. Direct & Reverse Return Piping Systems
  - B. Pipe Sizing
  - C. Piping Specialties
  - D. Flow Control
- Class 2: Equipment
- A. Pumps
  - B. Chillers
  - C. Terminal Units (Air Handliners, Fan Coil Units, Coils)
  - D. Cooling Towers
  - E. Compression-Expansion Tanks

**Who Should Attend:** This class is designed for the Master Heat Pump Technician, Commercial Technician, and other advanced level technicians.

\*The Heat Pump Council provides heavy hors d'oeuvres & beverages served from 5:30 p.m. - 6:00 p.m..

### Cancellation Policy and No-Shows

A full refund will be issued as long as **written notice is received 48 hours prior** to the class starting time. Due to the number of courses held and registrations received, we do not provide written or verbal confirmation. Returned checks are subject to a \$30.00 returned check fee. **All registrations received by mail or fax are confirmed registrations unless cancelled within the proper time frame or unless notification of full or cancelled classes is received from the Arizona Heat Pump Council. Participants are charged the full fee amount if they register but do not attend. There are no refunds for no-shows.**

**\*\* \_\_\_\_\_ Please initial here to indicate you have read, understood, and agreed to this cancellation policy.**

### Method of Payment Payment must be received prior to start of class.

# GO TO THE HEAD OF YOUR FIELD With These Certificate Programs

Register at the Electric League, attend most classes at Gateway Community College

## RESIDENTIAL WIRING CERTIFICATE

**Prerequisites:** None

**Description:** This certificate program is specifically designed to provide a foundation of fundamental electrical knowledge and skills in residential applications. These include use of tools, applied calculations, theories and concepts of electricity and electronics, residential wiring and codes. The Certificate of Completion (CCL) lays the framework for the International Code Council (ICC) and International Association of Electrical Inspectors (IAEI) certification exams. Students are admitted to the Certificate of Completion (CCL) in Electrical Technology-Residential Wiring Program only through the Electric League of Arizona. Upon successful completion, the student will be prepared to progress to the Commercial Wiring Certificate Program.

**Required Courses:**

- ELC 103 Electrical/Mechanical Calculations
- ELC 119 Concepts of Electricity & Electronics
- ELC 123 Residential Electrical Wiring & Codes
- ELC 160 Applied Electrical Codes
- ELC 164 Grounding & Bonding

## COMMERCIAL WIRING CERTIFICATE

**Prerequisites:** Completion of the Residential Wiring Certificate Program or permission of instructor.

**Description:** This Certificate Program builds upon your knowledge of residential applications and provides you with greater depth in skills and commercial electrical applications. Upon successful completion of the series you will be awarded a Certificate of Completion and will be prepared to advance to the Industrial Wiring Certificate Program.

**Required Courses:**

- ELC 120 Solid State Fundamentals
- ELC 161 Applied Electrical Codes II
- ELC 217 Electric Motor Controls
- ELC 125 Commercial Electrical Wiring & Codes

## INDUSTRIAL WIRING CERTIFICATE

**Prerequisites:** Completion of Commercial Certificate Program or permission of the instructor.

**Description:** This Certificate Program continues to develop your knowledge of advanced electrical skills, typical of industrial applications. Upon successful completion of this series you will be awarded a Certificate of Completion and will be prepared to advance to the Electrical Technology Associate's degree program.

**Required Courses:**

- ELC 124 Industrial Wiring and Codes
- ELC 144 Basic Automated Systems Using Programmable Controllers
- ELC 210 AC/DC Machinery
- ELC 218 Variable Frequency Drives

## CERTIFICATE OF COMPLETION IN ELECTRICAL TECHNOLOGY

**Description:** This Electrical Technology Program is designed to provide students with a broadened educational background and leadership skills in facilities management. This expertise will allow employment within the industry in the areas of management, sales, field service, business ownership or instruction.

**Requirements:** Completion of the Electrical Technology Wiring Certificate Program in Residential Wiring, Commercial Wiring, and Industrial Wiring (39 Credits Total)

## ASSOCIATE OF APPLIED SCIENCE IN ELECTRICAL TECHNOLOGY

(Issued by GateWay Community College)

**Requirements:** 60-64 Credits Total  
2.0 GPA Overall

**Technical Program:** 39 Credits

**General Studies:** 22-25

**Classes** **Credits**  
**Technical Program:**

- ELC 144 Basic Automated Systems Using Programmable Controllers . . . . .3
- ELC 119 Concepts of Electricity & Electronics. . . . .3
- ELC 120 Solid State Fundamentals . . . . .3
- ELC 123 Residential Electrical Wiring & Codes. . . . .3
- ELC 124 Industrial Electrical Wiring & Codes. . . . .3
- ELC 125 Commercial Electrical Wiring & Codes. . . . .3
- ELC 160 Applied Electrical Codes . . . . .3
- ELC 161 Applied Electrical Codes II . . . . .3
- ELC 164 Grounding & Bonding . . . . .3
- ELC 210 AC/DC Machinery. . . . .3
- ELC 217 Electric Motor Controls. . . . .3
- ELC 218 Variable Frequency Drives . . . . .3
- ELC 103 Electrical/Mechanical Calculations . . . . .3

**General Studies:**

- ENG 101 First Year Composition . . . . .3
- ENG 111 Technical Writing. . . . .3
- COM 230 Small Group Communication . . .3
- CRE 101 Critical Reading (Or equivalent by assessment) . . .3
- MAT 122 Intermediate Algebra (Or equivalent by assessment) . . .3
- HUM 101 General Humanities . . . . .3
- CHM 130 Fundamental Chemistry . . . . .3
- CHM 130LL Fundamental Chemistry . . . . .3
- SOC 101 Introduction to Sociology . . .3

**Cancellation Policy**  
A full refund will be issued only if written notice of cancellation is received 7 days prior to class starting date. All classes subject to cancellation if minimum enrollment requirements are not met. Financial aid students must pay ELA the full fee and claim back the financial aid from Gateway.

# Electrical Courses

Unless noted, ELC classes earn three college credits and meet once a week at Gateway Community College, 108 N. 40th Street, Phoenix, AZ 85034. \*\*Fees for ELC classes are \$297 for ELA Members\* and \$333 for Non-Members.\* Plus a \$15 Gateway registration fee (per student). **Textbooks are additional** and may be purchased at the GateWay Community College Bookstore. (602-286-8400)

## 16-Week Classes

Once a week at Gateway College

### ELC 119

#### CONCEPTS OF ELECTRICITY & ELECTRONICS

Dates: Thurs., Aug. 23 - Dec. 6, 2018  
Time: 6:00 p.m. - 9:10 p.m.  
Instructor: Elmer Tepper  
Fees: \$297 Mbr/\$333 Non-Mbr  
Reg Fee: \$15 per student

Learn the principles of electric circuits, magnetism and electromagnetism including basic motors and generators. Understand the use of basic measuring instruments. This course also includes an overview of electronics in the modern world.

**Who Should Attend:** Highly recommended for entry level electrical workers, utility and distributor personnel or anyone wanting to understand the basics of electricity.

**Prerequisites:** None

## 16-Week Classes

\*Once a week at ELA Training Cntr.

### ELC 218

#### VARIABLE FREQUENCY DRIVES

Dates: Tues., Aug. 21 - Dec 4, 2018  
Time: 6:00 p.m. - 9:10 p.m.  
Instructor: Chris "Butch" Owens  
Fees: \$297 Mbr/\$333 Non-Mbr  
Reg Fee: \$15 per student

Principles and operation of frequency controlled AC motor drives, including current source inverters (CSI), variable voltage inverters (VVI) and pulse width modulated inverters (PWM). Heating, ventilation and air conditioning (HVAC) applications along with energy savings, motor pump sizing and torque load calculations.

**Who Should Attend:** This class is designed for anyone interested in learning more about VFD's including electricians, engineers, facilities maintenance and planners.

**Prerequisites:** None

## 16-Week Classes

\*Once a week at ELA Training Cntr.

### ELC 123

#### RESIDENTIAL ELECTRICAL WIRING & CODES

Dates: Mon., Aug. 20 - Dec. 10, 2018  
Time: 6:00 p.m. - 9:10 p.m.  
Instructor: Daniel Turley  
Fees: \$297 Mbr/\$333 Non-Mbr  
Reg Fee: \$15 per student

Analysis and interpretation of residential drawings, local codes and specific sections of the National Electrical Code including needed materials derived from plans and specifications and the proper procedures for wiring a residence and other special locations. Areas of focus include circuits, conductors, switches, outlets, heating, security, and communication systems.

**Who Should Attend:** This class will help journeymen, apprentices and contractors upgrade their residential skills.

**Prerequisites:** None

### ELC 217

#### ELECTRIC MOTOR CONTROLS

Dates: Wed., Aug. 22 - Dec. 5, 2018  
Time: 6:00 p.m. - 9:10 p.m.  
Instructor: Steve Holmquist  
Fees: \$297 Mbr/\$333 Non-Mbr  
Reg Fee: \$15 per student

Electrical symbols, line diagrams and logic. Contacts and starters, control devices, reversing circuits and power distribution systems. Magnetism and magnetic solenoids, reduced voltage starters, and circuits. Hand tools and safety procedures.

**Who Should Attend:** If you design, sell, install, or troubleshoot electrical controlled systems, this class will benefit you.

**Prerequisites:** None

## One-Day Seminars

\*Non-College Credit at ELA Training Cntr.

### ELA 70

#### ELECTRICAL SAFETY FOR COMMERCIAL/INDUSTRIAL FACILITIES

Date: Friday, October 26, 2018  
Time: 8:30 a.m. - 4:00 p.m.  
Instructor: Dan Turley  
Fees: \$255 Mbr/\$285 Non-Mbr

(Fees include Continental breakfast, lunch and hand-outs).

This full-day class will cover an overview of NFPA 70E including: Arc Flash & Arc Blast Hazards, Flash Protection & approach boundaries, Hazard Risk Categories & selection of appropriate PPE. Lockout Tagout procedures, general Electrical Safety related to electricity in Commercial and Industrial facilities. Recommended Safety practices and OSHA Codes.

**Who Should Attend:** Highly recommended for Facility Maintenance Technicians and Building Operators, Electricians, HVAC technicians and their Supervisors.

**Note:** Fees include a copy of NFPA 70E 2018.

\*ELA Training Center  
2702 N. 3rd St. Phoenix, AZ 85004

### ELA 13

#### NEC CODE UPDATE

Date: Friday, November 30, 2018  
Time: 8:30 a.m. - 4:30 p.m.  
Instructor: Daniel Turley  
Fees: \$255 Mbr/\$285 Non-Mbr

This full-day class will cover modifications in the NEC and discuss why the rule changes were made. Topics also include safety aspects of the NEC changes, conflicting rule changes, how to apply rule changes to real-world projects, and how the rule changes affect overhead costs.

**Note:** Course fees include a copy of the 2017 National Electric Codebook and lunch. (\$50 off for those w/Codebooks)

\*ELA Training Center  
2702 N. 3rd St. Phoenix, AZ 85004

**Please Remember Register Early  
to avoid disappointments

## The ELA Institute's Faculty

**Don Happ, Lighting Instructor** - Mr. Happ is the owner of D.H. Lighting Solutions, a lighting design and consultation firm for commercial, industrial and public projects. He is Past President and an instructor for the Arizona section, Illuminating Engineering Society, a CEM, certified by the EPA and holds LC certification in lighting.

**Derrick A. Denis, CIAQP, CAC, CIEC** - Mr. Denis has been providing professional environmental consulting and industrial hygiene services for over 15 years. Mr. Denis has been Vice President of Indoor Environmental Quality (IEQ) for Clark Seif Clark, Inc. (CSC) for 9 years. Mr. Denis has performed and/or managed over 7,000 IEQ investigations. He has acquired various industry-relevant certifications in addition to a B.S. in Environmental Science. Mr. Denis is an active participant in the IEQ industry: he sat on the Indoor Air Quality Association (IAQA) Board of Directors, acts as Director of IAQA Phoenix Chapter, and is a member of the American Indoor Air Quality Council (AmIAQC) National Advisory Board.

**Ed Weiss, Power Quality Instructor** - Mr. Weiss has a distinguished background in Power Quality Engineering for the past nineteen years and is a published author, seminar speaker, holds two P.Q. related patents and is currently President of Applied Power Quality Solutions.

**Elmer Tepper, Electrical Instructor** - Mr. Tepper entered the electrical field as an electrician and worked in this field for fifteen years. After receiving his BSEE degree, he worked in electrical engineering design and project management for a variety of industrial, commercial and institutional facilities.

**Steve Holmquist** - Mr. Holmquist worked for several Fortune 500 companies over the last 37 years, Steve is experienced in every phase of facilities management, construction, maintenance, production systems and system integration projects from planning to completion. Expert level knowledge and proficiency in critical building infrastructure design, construction, manufacturing and operations. Designed and managed construction of data centers, industrial and commercial buildings and the systems that reside within these facilities.

**Daniel Turley** - Mr. Turley has over 27 years experience in the commercial and residential electrical industry and currently works as a maintenance electrician. He has over 12 years of supervisory experience, including over 8 years as a Licensed Arizona electrical contractor, and has overseen large electrical installations. He is a certified Level 1 Thermographer. One of his current projects is to perform Arc Flash Studies on various buildings in the valley and to apply NFPA 70E to promote electrical safety in the work place. His expertise is in Commercial, Residential and Industrial electrical work but he has general knowledge and understanding of plumbing, HVAC, and maintenance procedures. He has long been interested in vocational education, completing a Master of Education degree in Educational Media and Computers. He has written several computer-based training programs. He also has a Bachelor of Science in Psychology from ASU.

**Vic Pietkiewicz** - Mr. Pietkiewicz has over 45 years of experience in the engineering and construction industry. He is the Owner of Dove Valley Services, LLC a consultant to the construction industry. Previously he owned his own air-conditioning company. Many of his years included creating training programs for mechanical and electrical engineers, managers, estimators, construction workers, and technicians. In addition to holding a technical school certificate in AC Engineering, and a B.Sc. in Engineering Technology (HVAC) he holds three AZ Registrar of Contractors licenses and a Federal EPA license.

**Chris (Butch) Owens** - Mr. Owens is currently a Partner and Service Manager for Mech-Line Services LLC and has worked in several capacities for the refrigeration industry for over 24 years. Mech-Line Services is ABB HVAC Drives Manufacturer's Representative in Arizona. Butch holds over 28 Variable Frequency Drives, Motors, Hardware and related Certifications with ABB pertaining to AC Drives and Induction Motors. He is also EPA 40 CFR and Section 609 EPA Certified for refrigerants high and low pressure and is most honored to be part of a development council for ABB HVAC Drives for future products. Butch has taught for the Arizona Heat pump Council since 2011 and is also an Adjunct Instructor for the Electric League of Arizona's Electrical Continuing Education Program done in partnership with GateWay Community College.
